

Tangiers International is a discrete professional organization that specializes in delivering solutions to complex emergency situations. Within the Ukrainian context Tangiers International is offering a service that allows for the extraction of persons who require immediate evacuation based on medical conditions or security risk situations.

## Security Evacuation

Tangiers International has established good workable links with its own team and credible partners within Ukraine and surrounding countries to be able to deliver the required solutions and effect. The company has been monitoring the situation in the Ukraine for the past weeks and through its contacts has the ability to assess current context based on developments in the following domains:

- Political
- Military and security
- Health and safety
- Medical support
- Geographic: weather, terrain, infrastructure

This has allowed Tangiers International to establish situation awareness and to keep an updated picture of developments in Ukraine and the immediate region. Teams are already available in Dnipro, Kharkiv, Kiev and other locations in Western Ukraine.

Whilst in a readiness posture teams will continue refining contingencies, situation awareness and gaining localized and time sensitive information that will drive options in course of action development. Tangiers International has an ability to surge with other teams ready to augment the initial team structure.

Suitable vehicles have been identified and selected and will be available for tasking upon confirmation of a likely operation. Supporting medical personnel and ambulances have also been selected to support as necessary.

Solutions to evacuation challenges can be tailored to specific requirements. In principle the prime task is to extract people and patients at risk to a safe location in-country. Onward travel arrangements via land / air can be arranged into neighboring states or to a state of preference with Moldova being the most recommended. Tangiers International is able to negotiate cross border formalities efficiently and effectively on an expedited basis.

All evacuations are conducted in line with best practices and with dedicated medical personnel. Notification and further enquiries for operations in Ukraine can be sent via the following contacts:
